

## Subject Index - E

- Earth, atmosphere of, See: Atmosphere, earth's,  
-----, cooling of, nocturnal, law of, Jackson on, 36:103–05  
-----, currents of, Klotz on, 43:596–98  
-----, drying up of, 36:411–12  
-----, effect of Mars on, 28:543–44  
-----, electric charge of, origin and maintenance of, Swann on, 44:68–69  
-----, magnetism of, See: Magnetism, terrestrial,  
-----, physics of, bulletins on, by National Research Council, 59:122  
-----, pressure anomalies over, interrelations of, Exner on, 55:238  
-----, pulsation of, relation between, and barometric pressure, 37:65  
-----, relation between, and sun, 54:214  
-----, relief of, influence of, on rainfall, 30:223–24  
-----, rotation of, deflecting force of, deriving, Harris on, 36:327–28  
-----, rotation of, deflecting force of, deriving, Jackson on, 36:369–70  
-----, rotation of, deflecting force of, deriving, Okada on, 36:147–48  
-----, rotation of, deflecting force of, effect of, on flight of aircraft, Marvin on,  
    47:75–77  
-----, rotation of, deflecting force of, effect of, on movement of air, Ekholm on,  
    42:330–39  
-----, rotation of, effect of, on condition of atmosphere and ocean, Sandström on,  
    42:523–26  
-----, solid, tides of, Hecker's observations on, 36:166–69  
-----, structure of, internal, Jeffrey's on, 43:564  
-----, surface of, convection from, atmosphere warmed by, Schmidt on, 50:490  
-----, surface of, force of gravity at, 37:133  
-----, windbelts of, as factors of climate, Bonacina on, 49:391–93
- Earthquake-proof buildings, 25:309; 29:507–08
- Earthquakes, See also: Seismology section of issues  
-----, 1663–1898, New Brunswick, 26:266  
-----, 1732–1837, Pacific coast, McAdie on, 35:579  
-----, Oct.–Nov. 1880, Sitka, Alaska, Jan. 1881:17–18  
-----, July 28, 1883, Island of Ischia, 11:169  
-----, Aug. 1883, Java, 11:293–94  
-----, Oct. 16, 1883, Turkey, 11:237–38  
-----, Aug. 1884, eastern United States, 12:201–04  
-----, Nov. 27, 1893, 21:332–33  
-----, Sept. 1, 1895, 23:339–40  
-----, Oct. 24, 1895, at sea, 23:380–81  
-----, Oct. 31, 1895, [il], 23:374–79  
-----, May–June 1897, 25:257–58  
-----, June–July 1897, 25:310  
-----, Sept. 1897, 25:399

- , Oct.-Nov. 1897, 25:493  
-----, Dec. 1897, 25:542  
-----, Dec. 29, 1897, Port au Prince, Hayti, 26:169  
-----, Dec. 1897 to Jan. 1898, 26:20  
-----, March 1898, 26:116-17  
-----, April-May 1898, 26:218-19  
-----, June 1898, 26:266-67  
-----, Aug. 1898, 26:365  
-----, Sept. 1898, 26:415  
-----, Sept.-Nov. 1898, 26:568-69  
-----, Jan. 1899, 27:18  
-----, Feb. 1899, 27:63  
-----, March-May 1899, 27:161  
-----, March 15, 1903, Washington, D.C., [il], 31:125-27  
-----, June 2, 1903, Washington, D.C., 31:270  
-----, Dec. 5, 1903, Washington, D.C., 31:524  
-----, Jan. 20, 1904, Washington, D.C., 32:14  
-----, June 25-26, 1904, Marvin on, 32:260  
-----, Aug. 27, 1904, Marvin on, 32:370-71  
-----, 1905, Marvin on, 33:308-09  
-----, Jan. and Feb. 1905, Marvin on, 33:13  
-----, March 21, 1905, Marvin on, 33:100  
-----, April 4, 1905, India, Marvin on, 33:148-49; 35: 361-63  
-----, May 1905, notes on, by Weather Bureau observers, 33:210  
-----, July 22, 1905, Bosch-Omori seismograph record of, 33:July 1905, pt. 1  
-----, 1906, recorded at Weather Bureau, Marvin on, 34: 618-20  
-----, April 18, 1906, San Francisco, 38:454  
-----, April 18, 1906, San Francisco, phenomena of, 35:505-06  
-----, Jan. 14, 1907, Kingston, Jamaica, Marvin on, 35:5-6  
-----, April 15, 1907, Mexico, Marvin on, 35:157-59  
-----, Oct. 5, 1909, Salt Lake City, Utah, 37:659  
-----, Aug. 1910, California, 38:1265  
-----, July 1, 1911, California, 39:1091-92  
-----, April 28, 1913, over Champlain and St. Lawrence Valleys, 41:544  
-----, 1915, United States, Humphreys on, 43:634-35  
-----, 1916, United States, Humphreys on, 44:697-98  
-----, Feb. 21, 1916, southern Appalachians, Humphreys on, 44:154-55  
-----, Aug. 26, 1916, North Carolina, Finch on, 44:483  
-----, Oct. 18, 1916, Alabama, Finch on, 44:690  
-----, Oct. 18, 1916, north-central Alabama, Hopkins on, 44:690-93  
-----, April 9, 1917, Missouri, Finch on, 45:187-88  
-----, April 9, 1917, Missouri, Paige on, 45:318  
-----, Sept. 3, 1917, Minnesota, Posey on, 45:556-58  
-----, 1918, United States, Humphreys on, 46:594-95  
-----, Sept. 7, 1918, sea waves produced by, 46:431  
-----, Sept. 5, 1919, Virginia, Woolard on, 47:839

- , Carson City, 28:64–65
- , causes of, Abbe on, 23:375
- , Davison on, 23:340–41, 375
- , frequency of, relation between, and barometric gradient, 48:355
- , frequency of, relation between, and rainfall, 48:355–58
- , frequency of, relation between, and rainfall, Zeil on, 48:356
- , Montana, 29:175
- , observation of, Davison on, 23:340–41
- , observation of, guide to, 33:486–89
- , Port Carolina, South Australia, 30:10–11
- , tectonic, relation between, and latitude variations, Zeil on, 48:469–70
- , waves of, propagation of, through earth, Knott on, 46:251
- , weather preceding, 46:180–81
- Earthshine, variability of, causes of, 29:209–11
- Eclipse, lunar, July 4, 1917, Honolulu, Reichelt on, 45:575–76
- , lunar, Dec. 27–28, 1917, Honolulu, Reichelt on, 45:575–76
- , solar, Jan. 22, 1898, observations during, 28:449–50
- , solar, May 28, 1900, 28:110–11
- , solar, May 28, 1900, probable state of sky at, 25:394–95, 404–05; 27:422
- , solar, Aug. 20, 1905, Rigge on, 33:103
- , solar, Aug. 30, 1905, Spain and Algeria, United States Naval expedition to, 33:295–96, 320–21
- , solar, May 9, 1901, Tasmania, 36:412
- , solar, Oct. 10, 1912, Boa Vista, Brazil, atmospheric electricity observations on, 45:443
- , solar, Aug. 10, 1914, Honolulu, Wyatt on, 43:402–03
- , solar, June 8, 1918, cloud observations during, Fergusson on, 47:149–50
- , solar, June 8, 1918, influence of, on radiation, Kimball on, 47:5–16
- , solar, June 8, 1918, Weather Bureau observations in connection with, 46:167
- , solar, May 29, 1919, Cape Palmas, Liberia, Bauer on, 47:808–09
- , solar, May 29, 1919, magnetic and allied observations during, proposed, Bauer on, 47:17
- , solar, April 8, 1921, Davos, radiation and polarization measurements during, Dorno on, 53:208
- , solar, Jan. 24, 1925, aerological observations during, Samuels on, 53:23
- , solar, Jan. 24, 1925, Washington, D.C., observations on, Kimball on, 53:22–23
- , solar, Jan. 24, 1925, weather elements during, changes in, Varney on, 53:21–22
- , solar, June 29, 1927, Malmberget, Sweden, illumination by diffused light
  - , Kalitin's paper on, 57:159–60
- , solar, April 28, 1930, Havre, Mont., Math on, 58:162–63
- Eclipse expeditions, necessity of weather data for, 47:413
- Eclipse shadow bands, relation between, and atmospheric phenomena, 28:210–11
- Ecology, agricultural, problem of, Azzi on, 50:193–96
- Eiffel Tower, temperature and wind speed variations on, Dongier on, 49:158–59
- El Misti, visit to, Ward on, 26:150–52
- Elasticity, low temperature, Benton on, 31:20–22

- Electric power service, Cincinnati, relation of thunderstorms to, Devereaux on, 55:112–18
- Electric spark, production of, at formation of ice, 35:317
- Electric storm, See also: Thunderstorms
- , Aug. 25, 1886, Eustis, Fla., 23:298
- , March 23, 1913, Kansas, Flora on, 41:416
- , California, Barwick on, 25:539–40
- , California, southern, Grunsky on, 35:228
- , Kansas, 26:216
- , Kansas, western, Flora on, 40:895
- , Kansas, western, probable cause of, Flora on, 41:894
- , mountain tops, Church on, 35:578–79
- , Oklahoma, silent, 23:13
- , Sacramento, 25:542–43
- Electricity, atmospheric, 33:209
- , atmospheric, Brillouin's theory of, 25:446–47
- , atmospheric, Chapman on, 47:879
- , atmospheric, considering, from standpoint of electron theory, 31:229–32
- , atmospheric, Everett on, feb. 1879:13–14
- , atmospheric, Exner on, 15:121–22
- , atmospheric, experiments in, 19:171
- , atmospheric, experiments in, West on, 24:333
- , atmospheric, Mascart on, Nov. 1879:15–16
- , atmospheric, observations of, after eruption of Mt. Pelée, May 8, 1902, 33:241–42
- , atmospheric, origin of, 26:259–60
- , atmospheric, origin of, Edlund on, Nov. 1878:12–13
- , atmospheric, origin, variations, and perturbations of, 25:440–42
- , atmospheric, problems of, Simpson on, 44:115–22
- , atmospheric, relation between, and movement of depressions, Lacoste on, 49:614
- , atmospheric, relation between, and rainfall, 34:121–22
- , atmospheric, Teneriffe on, measurements of, 46:211
- , atmospheric, variation of, diurnal, in clear weather, Chauveau on, 46:212
- , local, in Wyoming windstorm, 22:509
- , static, forecasting thunderstorms by, Reichelderfer on, 49:152–53
- , waterfall, Lenard on, 43:509–10
- Electrometer, variation of, semidiurnal, relation between, and barometer, Sanford's article on, 57:383
- Electromotive force, high, Trowbridge's memoir on, 36:92–93
- Electrons, theory of, atmospheric electricity considered from, 31:229–32
- Elevation, difference between, and altitude, 50:142
- Ellendale aerological station, Jakl on, [il], Suppl. 12, pt. 3
- Energy, human, effect of temperature on, Huntington on, 48:278–79
- Energy-evaporation equation, alignment diagram for, Cummings on, 58:142–44
- Engineer, aeronautical, meteorological courses for, 45:298

-----, agricultural, relation between, and Weather Bureau, 37:1107–08  
-----, relation between, and Weather Bureau, Ockerson on, 37:1060  
-----, use of U.S. Weather Bureau observations by, Lee on, 61:7–10  
Engineering, climatic cycles in, importance of, Streiff on, 57:405–11  
-----, climatic cycles in, importance of, Streiff's article on, Sherman's discussion of, 58:114–15  
-----, relation between, and meteorology, Bliss on, 40:1446–47  
-----, relation between, and meteorology, Davies on, 49:160  
-----, relation between, and meteorology, Horton on, 47:305–07  
-----, relation between, and meteorology, Lee on, 61:7–10  
-----, relation between, and meteorology, Thiessen on, 40:1565–67  
-----, relation between, and Weather Bureau, Smith on, 38:735–36  
-----, sunlight, Seymour's article on, 49:93  
English, study of, 36:178  
Epidemic, spread of, by rains and winds, 23:295–96  
“Equatorial current”, rainfall capacity of, Besson on, 53:260  
Equipluve, relation between, and isohyet, Wallis on, 46:229–30  
Erosion, cause of, 28:544  
-----, Sioux Point, S. Dak., McDowall on, 39:877  
Eruption, volcanic, cause of death by, Cole on, 46:452–58  
-----, volcanic, Hawaii, Lyons on, 27:298–99  
-----, volcanic, Hawaii, relation between, and sun spots, 27:144  
-----, volcanic, Krakatoa, green sun during, 34:408  
-----, volcanic, Lassen Peak, May 30, 1914, Palmer on, 44:571–73  
-----, volcanic, Martinique, May 1902, meteorological conditions following, 30:267–69  
-----, volcanic, Mount Pelée, atmospheric electricity after, 33:241–42  
-----, volcanic, Mount Pelée, noises during, 30:269  
-----, volcanic, relation between, and solar radiation intensities, Kimball on, 46:355–56  
-----, volcanic, St. Vincent, May 1902, meteorological conditions following, 30:267–69  
-----, volcanic, Sakurashima, Jan. 1914, 42:138  
Escanaba river, water power projects on, Jakl on, 40:1497  
Etesiens, Paraskévopoulos on, 50:417–22  
Ether, effect of, on atmosphere, 27:362  
“Etudes Pratiques”, Eiffel's, 33:442–44; 34:359–60  
Euphrates Valley, electrical phenomena in, 28:286–87, 290  
Europe, boundary-surface over, quasi-stationary, waves and vortices on, 54:458–59  
Evaporation, 23:421–22  
-----, Alps, Swiss, measurements in, 53:355–56  
-----, amount of, Horiguti on, 42:101–04  
-----, Arizona, relation between, and rainfall, Smith on, 58:253–54  
-----, atmospheric, researches on, Weilenmann on, 42:158–64  
-----, Bates on, [il], 47:283–94  
-----, bibliography of, annotated, Livingston on, 36:181–86, 301–06, 375–81;

- 37:68–72, 103–09, 157–60, 193–99, 248–52  
-----, Birmingham, Ala., 1909, Lehman's report on, [il], 38:313–16  
-----, California, stations of, record of, Eklund on, 57:378–81  
-----, Canal Zone, Cornthwaite on, [il], 47:29–30  
-----, Caribbean Sea, Ray on, 59:192–94  
-----, checking, influence of soil mulches in, Bark on, [il], 38:1098–99  
-----, circular surface, Burger on, 47:858  
-----, comparison of, with vapor pressure deficit and wind velocity, Johnston on,  
    47:30–33  
-----, depth of, in United States, Russell on, [il], 16:235–39  
-----, earth, relation between, and precipitation, Wüst on, 50:313–14  
-----, effect of, on temperature distributions of ocean or reservoir, McEwen on, 47:805  
-----, effect of atmosphere on, Livingston on, 43:126–31  
-----, effect of forest on, Bode on, 48:657–58  
-----, factors for, form and area, Gallenkamp on, 47:857  
-----, formula of, Horton on, 45:453  
-----, formula of, Marvin on, 37:57–61  
-----, Fort Collins, Colo., 25:210  
-----, gas molecules, Langmuir on, 45:452  
-----, Great Salt Lake, 29:68–69  
-----, heat of, Smith on, 35:458–63  
-----, Kingston, Jamaica, 1927, 56:189  
-----, lake, Bigelow on, [il], 35:311–16; 36:24–39, 437–45; 38:307–13, 1133–35  
-----, lake, computing, method of, from temperature gradients, McEwen on,  
    52:108–09  
-----, lake, Grunsky on, 60:2–6  
-----, lake, problems of, application of heat radiation measurements to, Angström  
    on, 49:27  
-----, measurement of, direct, Livingston on, 43:126–31  
-----, New York Botanical Garden, 36:63–64  
-----, observations of, methods and apparatus for, Marvin on, [il], 37:141–46, 182–91  
-----, observations of, results of, Horton on, 49:553–66  
-----, observations of, in United States, Kimball on, 32:556–59  
-----, observations of, by Weather Bureau, Kadel and Abbe on, [il], 44:674–77  
-----, Owens Valley, Cal., 38:127–29  
-----, Panama, Cornthwaite on, [il], 47:29–30  
-----, pans for, types of, comparison of, Loveland on, 48:715  
-----, Provo, Utah, measurements of, 38:277  
-----, rain gage, Carter on, 57:96  
-----, rate of, from circular water surface, 46:179–80  
-----, rate of, high, relation between, and western yellow tomato blight, 54:300  
-----, rate of, Horton on, 47:856  
-----, rate of, lunar period in, Sutton on, 45:501  
-----, rate of, in vegetation, at different heights, 54:61  
-----, records of, 1921–32, Bureau of Plant Industry's, compilation and summary of,  
    Horton and Cole on, 62:177

-----, relation between, and absorption, Schidlof on, 45:413  
-----, relation between, and forest fire weather, Bates on, 51:570–71  
-----, relation between, and forest fires, Munns on, 49:149–52  
-----, relation between, precipitation, and run-off, Humphreys on, 56:177–78  
-----, relation between, and temperature, Carpenter on, 26:213–14  
-----, reservoir, 49:209  
-----, reservoir, Bigelow on, [il], 35:311–16; 36:24–39, 437–45; 38:307–13, 1133–35  
-----, reservoir, computing, method of, from temperature gradients, McEwen on,  
    52:108–09  
-----, reservoir, Grunsky on, 60:2–6  
-----, snow, Horton on, 42:99–100  
-----, snow surface, experiments on, Baker on, 45:363–66  
-----, snow surface, Rolf on, 43:466  
-----, soil, moist, Lee's, Henry's review of, 52:99–101  
-----, study of, over lakes and reservoirs, Bigelow on, [il], 35:311–16; 36:24–39,  
    437–45; 38:307–13, 1133–35  
-----, study of, Lehman on, [il], 38:313–16  
-----, study of, methods and apparatus for, Marvin on, [il], 37:141–46, 182–91  
-----, study of, Woeikof on, 36:63  
-----, theory of, kinetic, March on, 44:680  
-----, underground, Balch on, 29:545–46  
-----, United States, southwest, ten years of, Linney on, 55:320–22  
-----, vegetative, at different heights, 54:61  
-----, vegetative, effect of, on rate of seasonal temperature changes, Finch on,  
    49:206–09  
-----, water surface, alignment diagram for, Cummings on, 58:142–44  
-----, water surface, Lee's, Henry's review of, 52:99–101  
-----, energy equation, alignment diagram for, Cummings on, 58:142–44  
Evaporimeter, Keeling on, 34:157–58  
-----, Piche, [il], 33:253–55  
-----, use of, in forest studies, Bates on, [il], 47:283–94  
Evening, character of, Connor on, 26:306  
-----, character of, Denson on, 26:26:215  
Expansion, cooling by, Peet on, 35:123  
Expedition, Abbe's, in North and South America, 31:380–81  
-----, Antarctic, German, kite work of, 29:177  
-----, Antarctic, Scottish, 31:31  
-----, Arctic, Amundsen's, meteorology of, 52:313–14; 53:120  
-----, Arctic, Amundsen's, meteorology of, Sverdrup on, 50:74–75; 53:471–75  
-----, Atlantic, north, deep-sea, 1910, in "Michael Sars", Clarke on, 59:158–59  
-----, Atlantic, south, German, April 1926, aerological work of, 54:426  
-----, Atlantic, south, "Meteor", 57:60–63  
-----, Greenland, Michigan University, return of, 1926, 54:427; 55:23–24  
-----, Greenland, Swiss, meteorological results of, Brooks on, 51:256–60  
-----, Koch, 1912–13, across Greenland, results of, 42:40  
-----, Marion, 1928, to Davis Strait and Baffin Land, results of, Smith's work on,

- 59:428-30
- , meteorological, to Bahamas, 31:189, 320  
-----, "Michael Sars", 1910, north Atlantic deep-sea, Clarke on, 59:158-59  
-----, North Pole, Nansen's, results of, 33:401-02  
-----, Northeastland, Swedish-Norwegian, Schneider on, 59:201-02  
-----, Shackleton, first, meteorological observations of, Kidson on, 58:294-95  
-----, South Pole, Kollm on, 29:421-22  
-----, Swedish, to North Atlantic Gulf Stream, Schneider on, 58:413  
-----, Wellmann, first, 26:312-13  
-----, Wellmann, second, 26:167-68, 414-15; 27:366  
-----, Ziegler, relief for, 33:438  
Explosion, Jan. 19, 1917, at East London, sound areas of, Davison on, 45:55-56
